

Beekeeping in Mecklenburg-Vorpommern, Germany

The Epidemiological Service/Animal Disease Control Service of the State Office for Agriculture, Food Safety and Fisheries (LALLF) MV conducted a survey on the current situation of beekeeping in Mecklenburg-Vorpommern at the end of 2015. Over 1,200 beekeepers in the state provided information on various aspects of beekeeping using a questionnaire.

*The year category labels are simplified: The category '≤ 2005' for example only refers to the years 2001-2005.
